

An OSI Systems Company

## **GENERAL PRODUCT COMPLIANCE & SAFETY INFORMATION**

### **Product Changes**

Commercial-Off-The-Shelf (COTS) product specifications, performance, materials, etc. as specified in datasheets are subject to change without notice. Please refer to the latest product specification sheet prior to use of LDI products.

### **Safety and Handling Cautions**

1. Laser light can be very dangerous for beams directed into the human eye. Do not look directly into the output aperture or through optical components such as lenses, prisms, mirrors, microscope objectives etc. Wear protective eyewear designed for the specific laser wavelength. NOTE: Lasers Class 3B and higher may cause permanent vision loss.
2. Laser devices should not be smashed or burned. Avoid storing and using devices in conditions where water, organic solvents or aggressive acids or bases may contact the module or where there is a possibility of exposure to corrosive gases, explosive gases, dust, salinity or other harsh conditions. Laser devices should be discarded as special industrial waste.
3. Exceeding operational limits even for a short time may cause permanent damage and destruction of a device.
4. Devices sensitive to electrostatic discharge and designated with an ESD symbol and special packaging may be permanently damaged without use of proper handling and storage precautions.

### **Conflict Minerals Policy Statement**

LDI is committed to conduct business with respect for human rights and in compliance with applicable laws. LDI is concerned with human rights violations and other atrocities reported in the DRC region of Africa and the potential for mining in this area to help finance groups responsible for these activities. In an attempt to eliminate financial

support for these groups, the US Congress passed the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 requiring companies to report on use and source of specific minerals including tin, tungsten, tantalum and gold. These minerals are essential to the manufacture of LDI products. LDI does its' due diligence by collecting and responding to information provided by our vendors who supply these minerals and ensures we fully comply with the laws.

#### **RoHS Compliance Statement**

Restriction of Hazardous Substances (RoHS) directive (Directive 2011/65/EC amended with Directive (EU) 2015/863) is the directive aimed at reducing harmful environmental impact of waste electrical equipment by restricting use of known dangerous substances. LDI collects information from suppliers and identifies if raw materials supplied are RoHS compliant. Based on information provided, we have certified most of our products as compliant. Customers are supplied RoHS information pertinent to their specific products upon request.

#### **REACH Compliance Statement**

Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) is a European Union regulation 1907/2006/EC that addresses the production and use of chemical substances and their potential impacts on human health and the environment. LDI collects information from suppliers and identifies if raw materials supplied are REACH compliant. Based on information provided, we have certified most of our products as compliant. Once again, customers are supplied REACH information pertinent to their specific products upon request.
